Course Overview

This two-day WSQ course develops the ability to research workplace wellbeing, identify employee needs, implement inclusive programmes, communicate benefits and improve effectiveness using safe evidence. Ten real-use-case activities connect concepts to workplace decisions.

Course Code	TGS-2024045222
TSC	HRS-HRM-3019-1.1 — Health and Wellness Programme Management
Duration	2 days · 16 hours
Training	14 hours
Assessment	WA 1 hour + Case Study 1 hour
Daily Time	9:00am–6:00pm

Learning Outcomes

- LO1: Identify workplace health and wellness trends, technologies and research implications for employees and the organisation.
- LO2: Implement inclusive health and wellness programmes for different employee groups and translate policies into day-to-day practices.
- LO3: Communicate programme benefits through appropriate channels and assess effectiveness using employee feedback and programme evidence.

Daily Schedule

Day 1 — Evidence, Needs and Programme Design

Time	Minutes	Topic / Activity	Method	Slides
09:00–09:30	30	Administration, outcomes and assessment briefing	Interactive presentation	—
09:30–10:45	75	Topic 1 — health, wellness, evidence and requirements	Interactive presentation · case study · discussion	Slides 20–56
10:45–10:55	10	Morning break	Break	—
10:55–12:20	85	Activities 1–2 — privacy and workforce needs	Interactive presentation · case study · discussion	A1: 43, A2: 47
12:20–13:20	60	Lunch	Lunch	—
13:20–14:50	90	Topic 1 — factors, trends, technology and research	Interactive presentation · case study · discussion	Slides 20–56
14:50–15:00	10	Afternoon break	Break	—
15:00–17:10	130	Activities 3–5 — technology, resilience and programme portfolio	Interactive presentation · case study · discussion	A3: 52, A4: 78, A5: 82
17:10–18:00	50	Day 1 synthesis and	Reflection · Q&A	—

		evidence review		
--	--	-----------------	--	--

Total training/assessment time excluding lunch: 480 minutes (8.0 hours).

Day 2 — Implementation, Communication and Improvement

Time	Minutes	Topic / Activity	Method	Slides
09:00–09:15	15	Day 1 retrieval practice and readiness check	Interactive presentation	—
09:15–10:25	70	Topic 2 — programme design and implementation	Interactive presentation · case study · discussion	Slides 57–96
10:25–10:35	10	Morning break	Break	—
10:35–11:50	75	Activities 6–7 — policy-to-practice and participation	Interactive presentation · case study · discussion	A6: 87, A7: 91
11:50–12:50	60	Lunch	Lunch	—
12:50–14:00	70	Topic 3 — communication, feedback and evaluation	Interactive presentation · case study · discussion	Slides 97–141
14:00–14:10	10	Afternoon break	Break	—
14:10–15:00	50	Activities 8–9 — campaign and feedback system	Interactive presentation · case study · discussion	A8: 118, A9: 122
15:00–16:00	60	Activity 10 — management review and integrated improvement	Reflection · Q&A	—
16:00–17:00	60	Written Assessment (WA-SAQ)	Assessment	—
17:00–18:00	60	Case Study (CS)	Assessment	—

Total training/assessment time excluding lunch: 480 minutes (8.0 hours).

Topic and Activity Breakdown

Topic 1 — Workplace Health, Wellness and Evidence · Slides 20–56

Mapping: K1 · K2 · K3 · A1 · A2. wellbeing dimensions · Singapore requirements · needs · trends · technology · evidence.

Activity 1 — Privacy-Safe Wearable Wellness Pilot · Slide 43

Assess whether a voluntary wearable pilot can address a defined employee need without creating surveillance, exclusion or unsafe data use.

- Output: One-page pilot decision, annotated data-flow map and privacy/equity risk register
- Acceptance: The submission defines a necessary purpose, minimises fields, removes manager access to individual data, offers a genuine alternative, specifies reporting thresholds and assigns every residual risk to an owner and gate.

Activity 2 — Segmented Workforce Wellbeing Needs Assessment • Slide 47

Combine workforce voice and operational signals to prioritise needs without diagnosing employees or exposing small groups.

- Output: Needs-assessment matrix and a two-priority management brief
- Acceptance: Every priority uses at least two evidence signals, small groups are suppressed, uncertainty is explicit, no condition is diagnosed, and recommended action addresses a workplace factor plus an access need.

Activity 3 — Evidence and Technology Selection Board • Slide 52

Compare wearables, telehealth, wellbeing apps, gamification and AI coaching against evidence, need, safety, inclusion and implementation fit.

- Output: Source appraisal ledger, weighted option board and pilot hypothesis
- Acceptance: The recommendation distinguishes research from vendor claims, maps each option to a defined need, includes privacy and accessibility gates, tests weight sensitivity and states scale/adapt/stop criteria.

Topic 2 — Programme Design and Implementation • Slides 57–96

Mapping: K4 · K5 · A3 · A4. programme portfolio · inclusion · policy-to-practice · resilience · participation · governance.

Activity 4 — Resilience Ecosystem After a Service Surge • Slide 78

Respond to fatigue and strain in a high-demand team without shifting responsibility onto employees to become tougher.

- Output: Resilience ecosystem map and a 90-day multi-level implementation plan
- Acceptance: The plan removes or reduces at least two preventable demands, adds team and organisational resources, treats individual training as complementary, includes safe escalation and has balanced employee/service measures.

Activity 5 — Whole-Person Wellness Programme Portfolio • Slide 82

Convert a broad wellness ambition into a coherent prevention-to-recovery portfolio with access, ownership and evidence.

- Output: Whole-person programme architecture with component logic models and priorities
- Acceptance: Every component links to an evidenced need, the portfolio covers work conditions plus support, access is designed for distinct groups, clinical/privacy boundaries are explicit and each component has an owner and review measure.

Activity 6 — Mental-Wellbeing Policy-to-Practice Playbook • Slide 87

Turn a generic mental-wellbeing policy into observable routines, decision rights, scripts and escalation paths.

- Output: Policy-to-practice manager playbook and implementation evidence plan
- Acceptance: The playbook covers routine through emergency situations, limits collection and diagnosis, names decision rights and handoffs, provides usable scripts and defines evidence of practice quality rather than training completion alone.

Activity 7 — Participation and Partnership Recovery Plan • Slide 91

Diagnose low engagement in an existing programme and redesign access, communication, incentives and vendor governance.

- Output: Participation recovery plan, vendor scorecard and budget-backed experiment

- Acceptance: The plan diagnoses funnel loss by group, addresses at least three root-cause categories, avoids coercive incentives, sets vendor quality/privacy standards and defines a measurable experiment with owner and stop rule.

Topic 3 — Communication, Feedback and Improvement • Slides 97–141

Mapping: K6 · K7 · A5 · A6. benefits · audience · channels · trust · feedback · metrics · management review.

Activity 8 — Inclusive Multi-Channel Wellbeing Campaign • Slide 118

Design a trust-centred campaign that reaches office, frontline and mobile employees without overclaiming outcomes.

- Output: Audience-message-channel matrix and six-week campaign plan
- Acceptance: Every priority audience has a defined action, credible benefit, trusted messenger and accessible channel; privacy is accurate; overclaiming is absent; and measures cover reach, comprehension, trust, action and equity.

Activity 9 — Employee Feedback and Listening System • Slide 122

Design a feedback system that combines surveys, focus groups, interviews and programme data while protecting identity and closing the loop.

- Output: Multi-method listening plan, draft instruments and close-the-loop protocol
- Acceptance: The system collects only decision-relevant data, uses complementary methods, protects small groups and free text, accurately distinguishes anonymity/confidentiality, includes safety escalation and commits to visible response timelines.

Activity 10 — Wellbeing Programme Management Review • Slide 126

Turn reach, experience, work-condition, outcome and cost evidence into a decision-ready management review.

- Output: Balanced programme dashboard and management decision paper
- Acceptance: The review validates data, follows the logic model, separates implementation from outcome, analyses equity, names confounders, avoids causal overclaiming and gives component-level decisions with owners and review triggers.

Resources Required

- Trainer slide deck and Learner Guide
- Ten individual activity folders with scenario PDF, mock data, questionnaire and checklist
- Spreadsheet software for mock-data analysis
- Internet access for cited public sources
- LMS access for courseware and assessment

Assessment

- Written Assessment (WA-SAQ) — 7 open-ended questions covering K1–K7, 1 hour, open book.
- Case Study (CS) — 3 integrated questions covering A1–A6, 1 hour, open book.
- Instrument type, question count, mapping and timing follow the retrieved approved Assessment Plan and legacy v2 papers.
- Assessment block: Day 2, 4:00pm–6:00pm.
- Order: SSG attendance → WA → CS → LMS submission → Assessment Summary Record.
