

Evidence Checklist - Activity 6

Mental-Wellbeing Policy-to-Practice Playbook

- ☐ Public facts are cited and separated from training assumptions.
- ☐ Every scenario question is answered with evidence or a stated limitation.
- ☐ The detailed procedure was followed and each checkpoint is recorded.
- ☐ Owners, decision rights, dates and review triggers are explicit where applicable.
- ☐ Acceptance test met: The playbook covers routine through emergency situations, limits collection and diagnosis, names decision rights and handoffs, provides usable scripts and defines evidence of practice quality rather than training completion alone.
- ☐ The final recommendation states residual risk and the next validation action.
